

## PROJECT INFORMATION

Installation of the sewer pipe down 11th Street South is now complete. Starting July 10th and continuing through late July/early August 2023 (weather permitting), the contractor will be working to install and switch services over to the new system. During this time, 11th Street South will remain closed to motorized vehicles (automobiles, golf carts, electric bicycles, etc.). To accommodate impacted residents and renters, a dedicated and restricted parking area has been provided along the west side of Gulf Drive South. A shuttle is being made available Monday through Friday between the hours of 8 a.m. and 7 p.m., to assist with transportation between the parking area and residential/rental units. Once service installations and connections on 11th Street South have been completed, the road will be reconstructed, with final paving to be performed simultaneously with other completed side streets.

The contractor working to install the gravity sewer eastward down 11th Street South.

Reserved parking along the west side of Gulf Drive South between 10th Street South and 8th Street South, for those located on 11th Street South.
